AFGE Takes Action on Cyberattack

When OPM revealed the hack on federal employee personnel information, AFGE acted:

- Filed a class action lawsuit on behalf of all current, former and retired federal employees who were or may have been affected by the data breach;
- Demanded OPM provide affected individuals with free lifetime credit monitoring;
- Demanded employees be insured for the entirety of any financial loss attributable to the breach;
- Demanded employees have time at work to make calls and visits related to protecting their personal information;

**Help us hold OPM accountable.
